K-Series Revolution Fork Positioner - Hydraulic Options 50% Off.*

Cascade F-Series Sideshifters now ship predrilled for easy field conversion to our K-Series Fork Positioner. With just 9 bolts and a low cost conversion kit you are just minutes away from efficient fork positioning. To help with this opportunity we have reduced the price of the Cascade K-Series hydraulic options: a sequence valve which permits fork positioning at the end of the sideshift stroke, solenoid valve, or radio frequency hydraulic control by 50%* through ~~September 30, 2009~~ January 31, 2010. Order a conversion kit and add the hydraulic option of your choice for a great savings. A Revolutionary idea? We thought so, that's why we call it The Revolution. Please see the enclosed Revolution Brochure, which you can place behind the Sideshifter tab in your Cascade Sales Manual. Contact Cascade for your conversion kit pricing today.
